Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 13, 17, 19-24, drawn to a method for identifying candidate compounds that decreases the expression or activity of a mammalian polypeptide selected from SEQ ID NO:54, SEQ ID NO:57 and SEQ ID NO:102, classified in class 800, subclass 3.
- II. Claim 25, drawn to a method for identifying candidate compounds that increases the expression or activity of a daf-gene, classified in class 435, subclass 375.
- III. Claim 26, drawn to a method for identifying candidate compounds that increases the expression or activity of akt-gene, classified in class 435, subclass 375.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the invention of group I require a decrease in the expression of daf-16 related mammalian homologs, whereas the invention of groups II and III requires an increase in expression or activity of a daf-gene or akt-gene. In addition, the nucleotide sequences of def-16 (SEQ ID NO:54, SEQ ID NO:57 and SEQ ID NO:102) are structurally and functionally distinct from the nucleotide sequences of other def-genes and akt-gene. Therefore these inventions have different designs, modes of operation, and effects and are not capable of use together. Thus these inventions are patentably distinct and are of separate uses.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required

because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
